

Fire Suppression

WHY JT PACKARD?

Any type of fire can be detrimental to a business, especially a mission-critical facility. The loss of equipment, information, or time not only means millions of dollars in lost revenue for yourself but for your clients as well. To protect your infrastructure against extensive fire damage, JT Packard offers you complete protection with our Fire Suppression Services.

SERVICES

JT Packard has a service model in place which thoroughly checks your equipment to ensure it is ready to perform if needed. Our services are designed to provide customers with a turnkey support program which will provide you with:

- Assessment
- System design
- Equipment selection
- Project management
- Start-up and extended warranty
- Service contracts

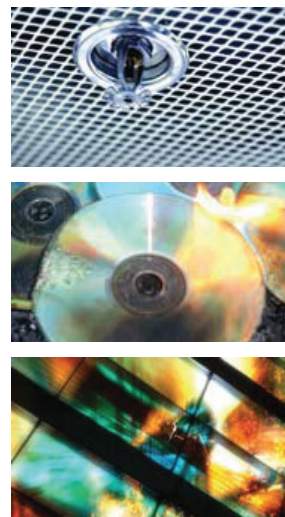

Field technicians are strategically located to provide you the very best in emergency response times. Each technician arrives with a fully stocked service van, as well as access to maintenance history.

SALES

JT Packard is committed to becoming your strategic partner by providing you with equipment and solutions in order to ensure your facility is protected from fire and/or explosion. We have the ability to provide you with equipment that is suited for your needs including:

- **Detection and Alarm Systems**
- **High Sensitivity Smoke Detection Systems**
- **Specialty Systems**
 - Explosion suppression and relief venting
 - UW/IR flame detection systems
 - Water leak detection
- **Suppression Systems**
 - HFC-277/FM200/FE-227
 - FE-25/ECARO-25
 - FE-13
